Internal= 30(Assessment=20; Practical=10)

COURSE OBJECTIVES
At the end of this course, the student will be able to
• explain concept of learning and motivation
• gain knowledge about the concept and theories of personality and its assessment
• differentiate between characteristics of adjusted and maladjusted learners
• understand and measure the learner’s cognitive abilities with special reference to intelligence
• get acquainted with concept and nature of children with special needs
It is assumed that the students are aware of role of Educational Psychology in theory and practice of Education.

NOTE: Examiner will set 9 questions, two from each unit and one question (Question No.9) covering the entire syllabus will consist of four short answer type questions. Students are required to attempt five questions in all, selecting one question from each unit and Question No. 9 which is compulsory. All questions carry equal marks. Duration of external examination will be three hours.

COURSE CONTENT

Unit-I
Learning and Motivation
(a) Learning: Concept, nature, factors affecting Learning, Latent Learning, Gagne’s Hierarchy of Learning
(b) Transfer of Learning: Concept, Types, Theories and Educational Implications
(c) Motivation: Concept, Types, its relation with learning, Achievement Motivation

Unit-II
Personality and Adjustment
a) Concept of Personality, western theories by Cattell, Eysenk, Allport, Freud; Vedantic concept of Personality (Panchkosh)
b) Adjustment, causes and manifestations of maladjustment, Defence Mechanisms, Conflicts and their management

Unit-III
Understanding Intelligence
a) Evolution of concept of Intelligence (from unitary to multiple intelligence)
b) Theories of intelligence by Gardner and Sternberg, assessment of multiple intelligence
c) Developing Emotional and Spiritual Intelligence

Unit-IV
Understanding Children with Diverse Needs
a) Children with diverse needs/different abilities: Concept, Classification, Role of Teacher
b) Concept, characteristics, identification of the following- Learning Disabled (Dyscalculia, Dyslexia & Dysgraphia), Slow Learners, Children with ADHD & with ADD
c) Inclusive Education: Concept, Process and Barriers

PRACTICALS (20 marks)
1. Intelligence test
2. Personality test/ Word Association Test
3. Test of adjustment/ analysis of a case of a maladjusted learner
4. DTLD/Test to identify ADHD

Credits= 4
Total Marks= 100
External= 70 Theory
Internal= (Assessment=20; Sessional work=10)

COURSE OBJECTIVES

At the end of the course, the students will be able to:
• select the tools for studying different variables.
• understand historical, descriptive and experimental method of research.
• select/ formulate the design of the study by controlling and classifying the variables demanded by the design.
• understand the meaning and compute ANOVA, Chi square, Wilcoxon Signed Rank Test Mann- Whitney Test.
• report the research work in accordance with the current trends and procedures of report writing.
• select and conduct the statistical analysis of the data by applying the statistics suitable for the problem.

NOTE: Examiner will set 9 questions, two from each unit and one question (Question No.9) covering the entire syllabus will consist of four short answer type questions. Students are required to attempt five questions in all, selecting one question from each unit and Question No. 9 which is compulsory. All questions carry equal marks. Duration of external examination will be three hours.

Table of critical values for statistical inference, e.g., F-ratio, t-ratio, r, chi-square, NPC areas, NPC ordinates, Wilcoxon- Mann- Whitney table etc. may be provided to the students.

COURSE CONTENT

Unit-I
a) Tools: Characteristics of a good tool, Meaning and methods of reliability and validity.
b) Psychological tests, questionnaire, rating scales, attitude scale (Thurston and Likert’s scale).
c) Technique: observation and interview.
Unit-II
a) Historical Method: Meaning, Value, Difficulties, Types and steps.
b) Descriptive Method: Meaning, Value and types.
d) Experimental Designs: Meaning, criteria for selecting an experimental design, Pre Experimental, True Experimental, Quasi Experimental, Factorial designs. (2x2)
e) Writing Research Report.

Unit-III
a) Significance of Statistics (Mean Only), Significance of difference between means: Large and small, Independent and correlated.
b) ANOVA(one way )

Unit-IV
Qualitative Research
a) Phenomenology, case study, Ethnography
b) Reliability and validity of qualitative research, analysis of Qualitative data

Sessional Work: (10 marks)

Students are required to attempt five questions in all, selecting one question from each unit and Question No. 9 which is compulsory. All questions carry equal marks. Duration of external examination will be three hours.

COURSE CONTENT

Unit-I

Nature of Science

a) Evolution of science as a discipline, science as a dynamic and expanding body of knowledge; development of scientific knowledge;
b) Science and technology, correlation between science and technology & other branches.
c) Common misconceptions of pupils about the nature of science; characteristics of different disciplines of science and their interrelationship.
Unit-II

Curriculum of Science Education
a) Trends in science curriculum, considerations in developing learner centred curriculum in science.
b) Criteria of validity of science curriculum: content, ethical, environmental, process, cognitive, historical
c) Analysis of science curriculum at secondary stage.

Unit-III

Approaches to Teaching-Learning of Science
a) Constructivist paradigm and its implications for science learning
b) Constructivist approaches to science learning: inquiry method, problem solving strategies, guided discovery approach; inducto-deductive method, project based learning, cooperative collaborative learning.
c) Role of experiments in science, development of laboratory design, planning and organisation of laboratory work, improvisation in the laboratory and low cost science experiments,
d) Metacognitive strategies—giving space to pupils to think, organize their knowledge and express teacher as a reflective practitioner.
e) Use of ICT in teaching-learning of science concepts at secondary level.

Unit-IV

Evaluation Assessment and Contemporary Issues in Science Education
a) Evaluation in science: Formative and summative
b) Self-assessment by students and by teachers, peer assessment, assessment of teachers by students.
c) Contribution of Indian scientists
d) Scientific and technological literacy
e) Innovations and creativity in science.

Transactional Mode
Group discussion, lecture-cum-discussion, panel discussion, symposium, school visits and sharing of experiences, experimentation with kits and laboratory work project and assignments focusing in observation and interaction with children adolescent, group and individual field based assignments followed by workshops and seminar presentation.

Sessional Work: The student teacher may undertake any one of the following activities:
• Development of lesson plan
• Development of achievement test (10 marks)

SUGGESTED READINGS

COURSE OBJECTIVES
After completion of the course, the students will be able to:
develop an understanding about the meaning, nature, scope of social sciences and social science education
find out the distinction and overlap between social sciences, humanities and liberal arts
understand the role of various methods and approaches of teaching social sciences
employ appropriate approach for transaction of social science curriculum
effectively use different media, materials and resources for teaching social sciences
construct appropriate assessment tools for teaching-learning of social sciences and undertake evaluation

NOTE: Examiner will set 9 questions, two from each unit and one question (Question No.9) covering the entire syllabus will consist of four short answer type questions. Students are required to attempt five questions in all, selecting one question from each unit and Question No. 9 which is compulsory. All questions carry equal marks. Duration of external examination will be three hours.

COURSE CONTENT

Unit-I
Conceptualisation of Social Science Education
a) Concept, nature, and scope of social sciences: existing approaches of teaching learning of social sciences
b) Epistemological frame proposed in educational policy documents and various national curriculum frameworks concerning teaching-learning of social sciences
c) Research perspectives in pedagogy of social science education

Unit-II
Social Science Curriculum
a) Approaches to organisation of social science curriculum; social science curriculum at various stages of school education
b) Methodology of development of curricular materials viz., textbooks, workbooks, teacher handbooks, teacher’s education manuals, other content enrichment materials –their conceptualization and processes;

Unit-III
Approaches to Pedagogy of Social Science
a) Critical appraisal of approaches to teaching learning social sciences – behaviourist approach; constructivist approach; inter disciplinary approach, integrated approach; child-centred approach; environmental approach; the overlap between these approaches
b) Critical appreciation of various learning-strategies: SQ3R (Survey, Questioning, Reading, Recite and Review), RAFT (Role, Audience, Format and Topic), Discussion and graphic organizers; cooperative learning

Unit-IV
Resources and Evaluation of Teaching-Learning of Social Science
b) Effective utilization of resources for teaching social science textbooks and supplementary materials; literature and biographies, environment and community resources;

c) Alternative assessment: rubrics, portfolios and projects

d) Typology of questions as related to different subject areas viz., History, Geography, Political Science, Economics etc.

e) Evaluation of attitudes, values, etc.

Transaction Mode
Lecture-cum-discussion, penal discussion, project on oral history, workshops, seminar, assignment a group discussion around issues and concepts. Group and individual field based assignment focused by workshops and seminar presentations.

Sessional Work: The student teacher may undertake any one of the following activities:
- Development of lesson plan
- Development of achievement test (10 marks)

COURSE OBJECTIVES
On completion of the course, students will be able to:

• gain an understanding of the nature, functions and the implications of planning for teaching language/languages
• understand the psychology of language learning
• gain an understanding in the pedagogy of language learning
• study and analyze different approaches, methods and techniques for differentiating between teaching language and teaching literature in the context of first language and second language
• examine various areas of research in language education
• survey various problems with respect to language learning
• identify and reflect on factors affecting language policy

NOTE: Examiner will set 9 questions, two from each unit and one question (Question No.9) covering the entire syllabus will consist of four short answer type questions. Students are required to attempt five questions in all, selecting one question from each unit and Question No. 9 which is compulsory. All questions carry equal marks. Duration of external examination will be three hours.
COURSE CONTENT

Unit-I

Conceptual Issues of Language Learning
a) Language acquisition and communication – factors affecting language learning and language acquisitions and communication
b) Linguistic, psychological and social processes involved in learning of languages
c) Models of Language Acquisition: Chomsky-Language Acquisition Device, Piaget - Cognitive Constructivism and Language; recent theorization: intentionality; application of these theories to development of methodologies of teaching-learning of language.

Unit-II

Language Analysis and Individualization of Language Learning
a) Discourse Analysis: Theories of discourse analysis including speech acts, conversational maxims, conversational analysis, ethno-methodology, text analysis, and critical discourse analysis.
b) Meta-linguistic awareness with a focus on listening, speaking, reading, comprehension at writing.
c) Need and techniques (viz. differential assignments, classroom tasks, etc.) for personalized system of instruction

Unit-III

Curriculum and Pedagogy of Language
a) Language learning at secondary and higher secondary stage
b) Pedagogy of First language, Second language, Third language
c) Development of language curriculum and the syllabus: dimensions, factors that influence the curriculum, selection and sequencing of content, contexts, transaction and evaluation techniques

Unit-IV

Issues in Language Learning and Evaluation
a) Cross linguistic influence in learning another language; ecology of bilingual memory
b) Multilingual classroom
d) Preservation of heritage language
e) Home language & school language – problem of tribal dialects
f) Problems related to evaluation of language learning

Transaction Mode
Lecture cum discussion, hands on practice in language laboratory, self-study, visits to language teaching institutes, presentations in seminar and group discussions workshop, assignment around issues and concepts related to contextual problems in language learning.

Sessional Work: The student teacher may undertake any one of the following activities:
• Development of lesson plan

COURSE OBJECTIVES

On completion of this course, students will be able to:

• Appreciate the abstract nature of mathematics.
• Distinguish between science and mathematics.
• Develop the skill of solving real life problems through mathematics modelling as an art.
• Develop the understanding of using constructivist approach in mathematics.
• Develop the skill of using various methods and techniques of teaching mathematics.
• Develop problem solving skills.
• Develop the skills required for action research in mathematics.

NOTE: Examiner will set 9 questions, two from each unit and one question (Question No.9) covering the entire syllabus will consist of four short answer type questions. Students are required to attempt five questions in all, selecting one question from each unit and Question No. 9 which is compulsory. All questions carry equal marks. Duration of external examination will be three hours.

COURSE CONTENT

Unit-I

b) Recreational and Aesthetic aspect of mathematics: Games, Puzzles, Riddles, Symmetry etc and their role in learning mathematics.
Mathematics Club: Need and Importance, Goals, Organization and Activities.
Mathematics Laboratory: Designing and Layout, Need and Importance, Materials and Procedure to set up.
c) Development of Mathematics with some famous anecdotes, Pythagoras, Aryabhatt, Ramanujan.
Teaching Mathematics Modeling.
Pedagogical Analysis of Mathematics

Unit-II

Curriculum of Mathematics
c) Developing Remedial Leaning experiences and teaching material to overcome special problems of students. Developing enriched programmes and materials for teaching gifted and backward students in mathematics.

Unit-III

Strategies of Teaching Learning Mathematics

**Unit-IV**

**Evaluation in Mathematics**

b) Types of test items in mathematics: Meaning, merits, limitations and Construction of long answer type, short answer type, very short answer type and objective type construction and standardization of an achievement test in mathematics.

c) Action Research in Mathematics

COURSE OBJECTIVES

At the end of the course, the students will be able to:

• acquaint the students with concepts and techniques of measurement and evaluation.
• develop skills in the construction and standardization of tests.
• acquaint themselves with the new trends in evaluation.
• enable them in learning the applications of advanced statistical techniques in education.
NOTE: Examiner will set 9 questions, two from each unit and one question (Question No.9) covering the entire syllabus will consist of four short answer type questions. Students are required to attempt five questions in all, selecting one question from each unit and Question No. 9 which is compulsory. All questions carry equal marks. Duration of external examination will be three hours.

Table of critical values for statistical inference, e.g., F-ratio, t-ratio, r, chi-square, NPC areas, NPC ordinates, Wilcoxon- Mann- Whitney table etc. may be provided to the students.

COURSE CONTENT

Unit-I
(a) Concept and importance of measurement and evaluation.
(b) Types of evaluation: Formative and summative.
(c) Scales of Psychological measurement: Nominal, Ordinal, Interval and Ratio.

Unit-II
a) Types of achievement tests- Essay, short answer, Objective type.
b) Norm referenced and criterion reference tests, projective and objective tests
c) Steps in standardization of achievement tests.
   Effectiveness of distracters.

Unit-III
a) Analysis of variance (two way)
b) Non parametric tests: Chi square, Mann-Whitney test, Wilcoxon signed rank test
c) Regression and prediction: Meaning and Concept of linear regression equation.

Unit-IV
Correlations: Assumptions and computation of:
a) Biserial, Point Biserial
b) Tetrachoric and phi- coefficient.
c) Partial and multiple correlation.

Sessional Work:
Development of a standardized test

SUGGESTED READINGS
COURSE OBJECTIVES:
After completing the course, students will be able to:

• explain the process of policy formulation
• critically analyse the determinants of educational policy
• explain the principles, methods and approaches of educational planning
• explain types, approaches and agencies for performance appraisal
• explain structure of educational organization
• explain various aspects of organizational climate
• discuss processes of educational management
• describe issues in organizational development and change
• explain meaning, nature scope types and traits of leadership

NOTE: Examiner will set 9 questions, two from each unit and one question (Question No.9) covering the entire syllabus will consist of four short answer type questions.
